

Databricks Certified Data Engineer Associate Preparation

Important Notes:

- Training sessions for Databricks cost \$1500 per person if scheduled separately, but we are getting them for free. This training and subsequent certification are very important for the overall success of our Databricks projects and initiatives.
- This is to inform you in advance that the lab which was provided by Databricks is going to end the last training session at the end of the day. We have almost 4 weeks to do hands-on work and make the most of it.
- Databricks Community Edition is free, but it will be active for 14 days and will not support all the features.
- Our expectation is that everyone should attend the Databricks certification exam post-completion of the course (in 2 weeks), and we will also provide exam-relevant questions, practice sets, an Online mock exam (WeCP), and instructions for availing vouchers, and Reimbursement process.
- Attendance is mandatory, we will share the training attendance details with your reporting mgrs. and delivery heads.
- Please mention your LTI mail id in the Zoom meeting or else your attendance will not capture.

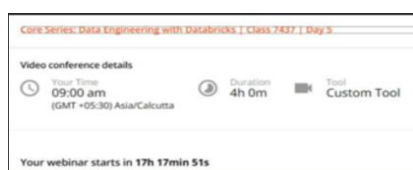

In case of any queries during the process, please feel free to reach out to the Databricks-COE Team [@Abhishek Patel / @Janga Reddy and @GunturuVenkataSatya ManiTeja]

How to connect to the partner academy site and Access the Course

- Create an account on Partners Academy Link: <https://partner-academy.databricks.com/learn> with your LTI email ID.
- As a stepping stone to “Databricks Certified Data Engineer Associate”, it’s mandatory to go through the course “Databricks Lakehouse Fundamentals” to understand the basics.
 - https://partner-academy.databricks.com/learn/learning_plan/view/215/databricks-lakehouse-fundamentals-learning-plan-v2
 - <https://partner-academy.databricks.com/learn/course/1321/fundamentals-of-the-databricks-lakehouse-platform-accreditation-v2>
- Search course name: Core Technical Series: Data Engineering with Databricks (Private Training)

How to join the Training session? Please follow the below steps

Click on Overview Tab and then click on Day 1, Day 2, etc.

E-learning path:

<https://partner-academy.databricks.com/learn/course/62/data-engineering-with-databricks-v2>

Course Catalog:

<https://databricks.com/learn/training/catalog/data-engineering>

Post completion of course , We provide access to Online Practice Tests, Exam-relevant questions and practice sets, reach out to Janga Reddy/@GunturuVenkataSatya ManiTeja

The exam pattern is as follows – It will be a 90 minutes exam with 45 multiple-choice questions. The questions will be distributed by high-level topic in the following way:

Databricks Lakehouse Platform – 24% (11/45)
ELT with Spark SQL and Python – 29% (13/45)
Incremental Data Processing – 22% (10/45)
Production Pipelines – 16% (7/45)
Data Governance – 9% (4/45)

How to register for the exam:

1. Visit <https://webassessor.com/databricks> and create your account using LTI email id
2. Visit Contact Us (<https://help.databricks.com/s/contact-us?ReqType=training>) to get the voucher
3. Register with your LTI Email ID
4. Select "Databricks Certified Data Engineer Associate"
5. Submit and you'll receive 65%-75% discount vouchers in your email
6. Go to <https://webassessor.com/databricks> again to schedule an exam using a voucher
7. Upon successfully passing the certification exam, record in iCore and apply for reimbursement.
8. **Please note : Attend the exam with your personal laptop only since admin access is required**
9. The Webassessor has certain steps that need to be followed before taking the exam such as setting up the exam browser and biometrics, login into the exam link, and set up the laptop a day before.

How to reimburse after passing the exam :

You will need the following items to set up an expense report on iCore.

1. Approval Email – reach out to Janga Reddy for the same
2. Certification copy – you can get it from <https://credentials.databricks.com/>
3. In webassor – you can get the invoice copy
4. Credit card transaction statement (snippet)
5. Create an expense report on Expense (concur.com)
6. Drop a message to shubhangi.tiwari@Intinfotech.com / karishma.shaik@Intinfotech.com to get the report approved
